

# Soumita Bhattacharya Sen

AE-302, Sector-1, Salt Lake, Kolkata - 700064, West Bengal, India.

E-mail: sbhattacharyaa3@gmail.com | M. No.: +91 9163539213

## Professional Summary:

Results-driven Data Analyst with 11+ years of expertise in delivering strategic business insights through advanced proficiency in Power BI, Tableau, Qlik View, Qlik Sense, Alteryx, and Google Looker. My strengths include end-to-end data sourcing and ETL orchestration using SQL Developer, Azure Databricks, and Informatica PowerCenter. Eager to innovate, I am expanding my skill set in Machine Learning, statistical analysis, and data modelling to design and implement cutting-edge, data-driven strategies.

## Technical Skills & Expertise:

### Business Intelligence & Data Visualization:

- Power BI (Advanced)
- Tableau (Advanced)
- QlikView
- Qlik Sense
- Google Looker
- SAP Analytics Cloud

### Data Engineering & ETL:

- SQL (Advanced - Developer, Query Optimization)
- Azure Databricks
- Alteryx
- Informatica PowerCenter

### Data Analysis & Methodologies:

- Data Analysis
- Data Analytics
- Data Modelling (including Statistical algorithms, Regression Analysis)
- Data Validation
- Quality Assurance (QA)

### Programming & Scripting:

- Python

### Version Control & Project Management:

- Git
- JIRA

### Office & Productivity Tools:

- Microsoft Excel (Advanced)

### AI Technologies:

- Gemini AI
- Copilot AI

## Work Experience:

### Data Analyst | Tata Consultancy Services

- Managed **comprehensive data collection and consolidation** workflows, ensuring accurate inputs for all reporting initiatives.
- Developed and optimized **interactive KPI dashboards and performance monitoring reports** leveraging advanced Tableau features (calculations, parameters, trend lines, maps, hierarchies).
- Authored and reviewed complex **SQL queries** utilizing various join clauses (inner, left, right) within Tableau Desktop to **validate large datasets** for accuracy and consistency.
- Facilitated cross-functional collaboration and improved operational efficiency by performing **thorough QA and evaluating inter-departmental workflows**.

## Communications Trainer | Wipro

- Enhanced customer service quality by **training and onboarding new associates** for a key UK telecommunication client (TalkTalk).
  - Improved team performance and compliance** through meticulous quality assurance assessments and constructive feedback delivery.
  - Analysed training effectiveness** and identified trends by developing and presenting comprehensive reports.
  - Contributed to operational efficiency by actively participating in **workflow optimization and quality improvement projects**.
- 

### Projects:

#### Kaiser Permanente | Data Analyst | *[Start Date] – [End Date, if different from overall TCS tenure or project-specific]*

- Managed end-to-end data collection and consolidation for critical reporting initiatives, ensuring data integrity and accuracy.
  - Designed and developed comprehensive, interactive dashboards using Tableau, including advanced features like calculations, parameters, trend lines, and mapping. These dashboards were pivotal in monitoring [mention specific performance metrics, e.g., "patient care efficiency," "operational costs"], providing actionable insights for [mention department/stakeholder, e.g., "senior management," "clinical teams"].
  - Authored and rigorously reviewed complex SQL queries (leveraging inner, left, and right join clauses) within Tableau Desktop to validate the accuracy and consistency of both static and dynamic datasets, significantly improving data reliability.
  - Facilitated cross-functional communication and optimized workflows by conducting thorough QA tasks and evaluating departmental processes, enhancing overall data accessibility and utilization across [Number] departments.
- 

#### EDFE | Analyst (Utility Domain Project) | *[Start Date] – [End Date, if specific to project]*

- Contributed as a key Analyst on a large-scale utility domain project focused on [e.g., "optimizing energy grid performance," "improving customer billing accuracy"].
  - Analysed multi-source datasets to identify [e.g., "operational inefficiencies," "cost-saving opportunities," "customer consumption patterns"], providing data-driven recommendations that contributed to [quantifiable impact, e.g., "a 5% reduction in energy waste," "improved revenue forecasting accuracy by X%"].
  - Developed custom reports and data extracts for stakeholder analysis, translating complex technical data into clear business insights.
  - Collaborated with engineering and operations teams to understand data requirements and ensure data quality for analytical models.
- 

#### PSG | Lead Power BI Developer | *[Start Date] – [End Date, if specific to project]*

- Led the complete lifecycle of critical Power BI solutions, from initial requirements gathering and data modelling to report design, deployment, and ongoing optimization for [mention specific business area, e.g., "global sales," "financial operations"].
- Architected and implemented robust Power BI data models for large and complex datasets, ensuring optimal performance, scalability, and seamless integration with diverse data sources.

- Drove the standardization of reporting across [Number] business units, creating reusable templates and best practices that enhanced data consistency and reduced development time by [Percentage].
  - Mentored and provided technical guidance to [Number] junior developers on Power BI best practices, data visualization techniques, and query optimization.
- 

## Education:

**Master of Arts (M.A.)** | Calcutta University | 2014

**Bachelor of Arts (B.A.)** | Calcutta University | 2012
